The image shows a Visual Studio Code editor window with a Go file named `pertemuan7.go`. The code defines two functions, `programPenjumlahan` and `programPengurangan`, and a `main` function that calls both. The `main` function also includes a comment `//Kerjakan Di Sini`. The terminal at the bottom shows the command `go run pertemuan7.go` being executed, resulting in the output `Hasil Penjumlahan: 20` and `Hasil Perkalian: 4`.

```
1 package main
2
3 import "fmt"
4
5 func programPenjumlahan() {
6     n1 := 12
7     n2 := 8
8
9     sum := n1 + n2
10    fmt.Println("Hasil Penjumlahan:", sum)
11 }
12
13 //Kerjakan Di Sini
14 func programPengurangan() {
15     n1 := 12
16     n2 := 8
17     sum := n1 - n2
18     fmt.Println("Hasil Perkalian:", sum)
19 }
20
21 func main() {
22     programPenjumlahan()
23     programPengurangan()
24 }
25
26 //Muhammad Faris Rasyid Raharjo
```

FTI/lepkom/web on master [?] via v1.19.4  
• go run pertemuan7.go  
Hasil Penjumlahan: 20  
Hasil Perkalian: 4
